

## Environmental Policy

The environment is very important for DEUTZ as a group. DEUTZ Nordic as a affiliate of DEUTZ AG supply powertrains and we have an unique position to influence product selection and optimally adapt our products so that machines are as energy efficient as possible. We use our competence and experience to support our customers' choices for a cleaner and better environment. We provide solutions and services to fulfill emission regulations and we provide solutions enabling alternative fuels, hydrogen and electric powertrains.

We are also working to find improvements in our own operations that can step by step reduce the environmental footprint.

Our overall objective is to reduce the environmental footprint by

- Supporting green business through DEUTZ Solutions – New Tech

- Provide highest emission stage engines

- Reduce transportation of people, product and goods

- Reducing energy consumption

- Reducing waste and recycle waste

- Reducing the use of plastics

- Reducing the use of paper

- Handling of hazardous waste and chemicals with great care

We will always comply with applicable environmental laws and requirements
